UBIKA

PARTENERSHIP
UBIKA and OVHcloud

UBIKA offers a faster, more secure path to Web & API protection for OVHcloud customers

We're proud to announce that our **WAAP (Web Application & API Protection) solutions** are now officially recommended by **OVHcloud**, which will serve both as a technology partner and hosting provider. This partnership validates the performance, robustness, and compatibility of our technology with OVHcloud's public and private cloud environments.

Shared values and high standards

This collaboration is grounded in a strong alignment between OVHcloud's technical requirements and our vision for modern application security. By prioritizing performance, reliability, and digital sovereignty, OVHcloud has selected UBIKA WAAP Gateway and Cloud Protector New Generation as part of recommended solutions for securing web applications and APIs.

Seamless, battle-tested integration

Our WAAP solutions deliver powerful protection for web applications and APIs against advanced threats such as DDoS attacks, malicious bots, and SQL injections. They can be deployed in SaaS mode, on-premises, or directly within the OVHcloud Public Cloud in high availability configurations. Integration with OVHcloud services—including vRack, Additional IPs, and OpenStack—enables fast, optimized implementation. A dedicated deployment guide is available on OVHcloud's website.

Tangible value for customers

For OVHcloud customers, UBIKA WAAP solutions offer a faster, more secure path to protection within a sovereign cloud:

- A pre-integrated, **technically validated solution** tailored for OVHcloud environments
- **Fully compliant with European standards**, including **ANSSI** certification
- Joint support **from two trusted leaders in cybersecurity and cloud infrastructure**

For **UBIKA**, this collaboration strengthens our position as **a European leader in application security**, while accelerating adoption of our technology by organizations securing their digital transformation within **a sovereign cloud**.
